Dog Toys - Barrett Ball™ / Barrett Tough™

In Loving Memory of James Hayes
Army Veteran and Inventor of
The Barrett Ball®

U.S. War Veteran, James Hayes, created and developed The Barrett Ball® for his German Shepherd service dog, Barrett. James was wounded in action and discharged after honorably serving three tours of duty in Iraq and Afghanistan. He was diagnosed with both Post Traumatic Stress Disorder (PTSD) and a Traumatic Brain Injury (TBI). After a long wait, Barrett was assigned to James to help him cope with his injuries. James was inspired to reward Barrett's loyalty and hard work by developing a toy he could finally enjoy without destroying it after a short time. This is how The Barrett Ball® was invented. A solid 5" rubber ball, weighing in at about 2 pounds finally stood the test against the aggressive chewer's tough jaws and teeth.
