INTRODUCING PROTEIN MIX-INS FOR DOGS

MINI NIBS PROTEIN MIX-INS

Mini Nibs Protein Mix-Ins are crunchy, bite sized forms of butcher cut protein to elevate every meal. Vital Essentials expanded their protein mix-ins line by introducing six new SKUs. This expansion aims to offer pet owners a wider variety of butcher cut protein options to enhance their pets' meals.

HOW TO FEED

Feed freeze-dried Mini Nibs Protein Mix-Ins as a meal mix-in. Sprinkle on top of your dog's food to add the benefits of raw protein to every meal.

GROUND PROTEIN MIX-INS

Ground Protein Mix-Ins are a finely pulverized form of butcher cut protein for enhanced blending and incorporation into various recipes. Ground Protein Mix-ins are available in three different SKUs, providing pet owners with a range of options for high-quality protein.

HOW TO FEED

Feed as a complete and balanced meal or feed as a meal mix-in. Sprinkle on top of your dog's food dry or add a liquid to make a gravy. Add less liquid to make a pâté.
